## Nitrogen gas pipeline to be laid in Sri City

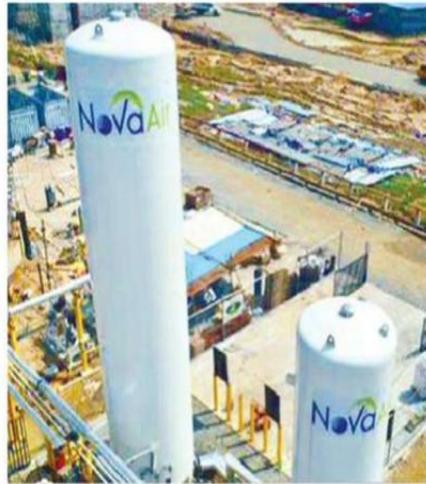

VANI MALLELA  
TIRUPATI

MARKING a significant step toward enhancing world-class utility infrastructure within the industrial hub, Sri City and NovaAir Technologies Pvt. Ltd. have signed an agreement to establish a nitrogen gas pipeline within Sri City. The initiative aims to strengthen industrial infrastructure by enabling a steady and reliable supply of nitrogen gas to manufacturing units in the region.

As per the agreement, NovaAir will design, build, own and maintain the pipeline system. Sri City has granted

gas distribution across the industrial park. The project will be rolled out in phases to ensure minimal disruption to ongoing industrial operations.

„This partnership with NovaAir marks another step in our journey to make Sri City a global model for industrial infrastructure. It reflects our commitment to innovation, sustainability, and providing world-class facilities that empower industries to thrive. We believe this initiative will set new benchmarks for utility infrastructure in industrial parks across India,” said Sri City Founder Managing Director

Dr Ravindra Sannareddy. Commenting on the agreement, NovaAir Technologies MD and CEO Gajanan Nabar said, “We’re thrilled to announce our nitrogen gas pipeline within Sri City’s industrial park. A utility pipeline network is a common feature of industrial parks in developed countries. This is perhaps the first time such an initiative of a global standard has been undertaken in India. This strategic partnership enables us to deliver reliable and sustainable gas supply solutions, driving growth and productivity for our customers.”

## AP: Sri City partners with NovaAir for nitrogen gas supply

Sri City (Tirupati Dist, Andhra Pradesh), July 24 (UNI): Sri City and NovaAir Technologies Pvt. Ltd. have entered into an agreement to install a nitrogen gas pipeline at Sri City, an integrated business hub and special economic zone.

The project aims to boost the region's industrial infrastructure by providing a consistent and dependable nitrogen gas supply to local manufacturing units, according to a statement released today.

Under the terms of the agreement, NovaAir will be responsible for the pipeline's design, construction, ownership, and ongoing maintenance. Sri City has granted them exclusive right-of-way, facilitating seamless gas distribution throughout the industrial park. The pipeline will be implemented in stages to minimize any disruption to existing industrial operations.

Dr Ravindra Sannareddy, Founder Managing Director of Sri City, expressed that this strategic partnership brings world-class utility infrastructure to industries within Sri City Industrial Park and is poised to set new standards for industrial park utilities across India.

Gajanan Nabar, MD & CEO of NovaAir Technologies, said, "Utility pipeline networks are a norm in industrial parks in developed countries; this is likely the first effort of this global standard in India. This partnership empowers us to deliver reliable and sustainable gas supply solutions, fostering growth and productivity for our customers."
